- HTML5 • CSS • C (Programming Language) • C++ • Javascript • Python • React Js
- Next Js • Typescript • Django • Django Rest Framework • TailwindCSS • Chakra UI
- Bootstrap • Sass • Data Structure & Algorithm • My Sql • Postgrsql • Webflow

WORK EXPERIENCE

Front-End Web Developer | The71 Agency

2023 - PRESENT

I am a Frontend Web Developer at The 71 Agency, specializing in React.js, Next.js, Webflow, HTML, and CSS. I focus on creating responsive, dynamic, and user-friendly web applications. Passionate about clean code and innovative designs, I strive to deliver high-quality solutions while continuously enhancing my technical expertise.

Front-End Web Developer (intern) | Getonnet, Norway

2023 - 2023

I worked as a Frontend Developer Intern at GetOnNet, Norway, where I collaborated with a team to develop a client portal using Next.js, TypeScript, and Chakra UI. This experience allowed me to enhance my skills in building dynamic and user-friendly interfaces while contributing to a real-world project for the company.

LATEST PROJECT

Online Banking

This online bank management project utilizes Django REST Framework and Next.js to provide role-based authentication for managers and customers. Customers can handle deposits, withdrawals, balance transfers, and loan applications, while managers oversee and approve transactions and loan requests, ensuring secure and efficient financial operations.

- **Secure Role-Based Access** – Provides distinct views and actions for managers and customers.
- **Transaction and Loan Management** – Allows transactions and loan requests; managers monitor and approve.
- **User-Friendly Dashboard** – Displays balances, recent transactions, loan status in a responsive, intuitive interface.

Vaccination Management

This vaccination management website enables role-based functionality for doctors and patients. Doctors can create vaccination campaigns and manage vaccine details, while patients can book appointments, access their profiles, and leave reviews. Developed using Next.js, TypeScript, Tailwind CSS, and Django REST for a responsive, secure, and efficient user experience.

- **Doctor Campaign Management** – Doctors create campaigns and add vaccine information for patient booking.
- **Patient Vaccination Booking** – Patients can book vaccination slots and view appointment details easily.
- **Review and Feedback** – Patients leave reviews for campaigns, enhancing service quality and transparency.
